- 

### Description:

On Point personnel worked to locate buried utilities surrounding the indicated lot on Lincoln Ave. Utilities were located and marked out to evaluate suitability of the proposed borehole locations on site. Utilities on N 1<sup>st</sup> St. were established to be in the street, not in conflict, clearing the N 1<sup>st</sup> St. sidewalk proposed borehole locations. Proposed locations along the northwest edge of the lot are also a safe distance from any buried utilities. Proposed borehole locations along the N 2<sup>nd</sup> St. sidewalk will need to be reconsidered in accordance with the following findings, also pictured on the *Job Site Sketch* (II). Active gas, water, and sewer lines were established to be located in N 2<sup>nd</sup> St. Active electric and communications lines were established to be located in N 2<sup>nd</sup> St., as well as beneath the adjacent sidewalk. The electric run in the sidewalk is likely to be multiple conduits buried in a common trench. Also located under the N 2<sup>nd</sup> St. sidewalk is an unknown anomaly. **The unknown anomaly was marked in blue on site, but this does not necessarily represent a water line.** The anomaly was detected consistently along the indicated length. A positive identification of this buried object is not possible without excavation.

### On Point Personnel On Site:

- Michael Carty

### Equipment On Site:

- Ground-penetrating radar: FGUTILSCAN-DF/652 Utility Scan DF SYS-800/300 HS W/650
- Utility locator: Radiodetection RD8000
- Utility locator: Metrotech 810

### Other Personnel On Site:

- Environmental Company: Employee Name
- Construction Company: Employee Name
